P.O. Box 30307
N. Las Vegas, NV 89036-0707

Dear Ms. Hanlon,

This letter is to request that Yucca Mt. site be recommended by the USDOE to President Bush for designation as the high-level radwaste and spent fuel national repository.

With the considerable investment of time, attention and money spent to establish a national disposal site, Yucca Mt has been identified as a suitable location. Furthermore, a single location for the storage of this type of waste, makes more sense than multi-site accumulation throughout the United States.

The nuclear industry's many years of experience handling, storing and transporting spent nuclear fuel using containers designed, built and tested to withstand extreme conditions, has proven the safety and performance of these containers to be outstanding. This data, coupled with the National Academy of Science's recommendation for geological disposal of high-level radwaste and the quality of the Yucca Mt facility, support my personal opinion and drive my request as a responsible citizen and interested taxpayer of the United States.

Please recommend Yucca Mt as our national repository for high-level radwaste and spent nuclear fuel. Thank you.

Sincerely,

Soozie Allen
